Title: A New Cooperative Framework for Parallel Trajectory-Based Metaheuristics

Author: Jialong Shi Qingfu Zhang

PII: S1568-4946(18)30028-0
DOI: https://doi.org/doi:10.1016/j.asoc.2018.01.022
Reference: ASOC 4669

To appear in: *Applied Soft Computing*

Received date: 24-4-2017
Revised date: 17-1-2018
Accepted date: 18-1-2018

Please cite this article as: Jialong Shi, Qingfu Zhang, A New Cooperative Framework for Parallel Trajectory-Based Metaheuristics, *<![CDATA[Applied Soft Computing Journal]]>* (2018), https://doi.org/10.1016/j.asoc.2018.01.022

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

- A new cooperative framework is proposed for parallel trajectory-based metaheuristics.
- A parallel variant of Guided Local Search (GLS) is designed using the proposed framework.
- Extensive experiments have been conducted on the Tianhe-2 supercomputer to test the designed parallel GLS algorithm.
