Title: Efficient Mining Product-Based Fuzzy Association Rules through Central Limit Theorem

Author: Zhongjie Zhang Witold Pedrycz Jian Huang

PII: S1568-4946(17)30688-9
DOI: https://doi.org/doi:10.1016/j.asoc.2017.11.025
Reference: ASOC 4569

To appear in: *Applied Soft Computing*

Received date: 8-4-2017
Revised date: 12-11-2017
Accepted date: 17-11-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- An algorithm fast mining product t-norm based fuzzy association rules is proposed.
- Sampling is used to reduce data.
- Sample size is set through central limit theory.
- Error is limited in a small range with high probability.
