This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

- The bare bones fireworks algorithm (BBFWA) is a very simple and efficient swarm intelligence algorithm.
- Sufficient conditions for local convergence are given theoretically.
- The BBFWA runs faster and performs better than previous versions of the fireworks algorithm.
- The performance of the BBFWA on real world problems is competitive.
