This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights of research paper titled "Optimization of wind farms by using the Firefly Algorithm"

- 1) This paper demonstrates that the recently discovered Firefly Algorithm is a better technique for the optimization of large Wind Farms.
- 2) It compares the Firefly Algorithm with the Genetic Algorithms or by the use of Spread Sheet methods such as Finite Difference Method.
- 3) It demonstrates the higher power derived and the lower cost of power produced by using the FA.
- 4) This paper demonstrates that the Firefly Algorithm outperforms the Genetic Algorithms and Finite Difference Method by a wide margin.
