This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Adaptive Pareto-based Approach for Geo-ontology Matching

Ujwala Bharambe and Surya S. Durbha

Centre of Studies in Resources Engineering (CSRE),

1

Author contributions

Ujwala Bharambe prepared datasets for geo-ontologies (reference matching datasets), wrote the codes, conducted the experiment for proposed framework and evaluated the results. Surya Durbha conceptualized the idea of Pareto optimization and analyzed the results.
