

# Accepted Manuscript

Improved workflow for unguided multiphase image segmentation

Brendan A. West, Taylor S. Hodgdon, Matthew D. Parno, Arnold J. Song

PII: S0098-3004(17)31328-6

DOI: [10.1016/j.cageo.2018.05.013](https://doi.org/10.1016/j.cageo.2018.05.013)

Reference: CAGEO 4138

To appear in: *Computers and Geosciences*

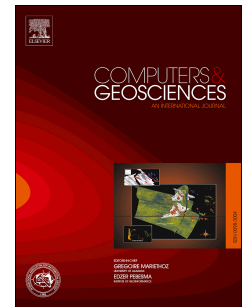

Received Date: 4 January 2018

Revised Date: 4 May 2018

Accepted Date: 25 May 2018

Please cite this article as: West, B.A., Hodgdon, T.S., Parno, M.D., Song, A.J., Improved workflow for unguided multiphase image segmentation, *Computers and Geosciences* (2018), doi: 10.1016/j.cageo.2018.05.013.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Improved Workflow for **Unguided** Multiphase Image Segmentation

Brendan A. West<sup>a</sup>, Taylor S. Hodgdon<sup>a</sup>, Matthew D. Parno<sup>a</sup>,  
Arnold J. Song<sup>a</sup>

**Authorship Statement:** Brendan A. West made substantial contributions to the development and testing of the presented methodology, and substantial contributions to the report. Taylor S. Hodgdon reviewed methodology development and testing, and made substantial contributions to the report. Dr. Matthew D. Parno advised methodology development, developed the local deconvolution algorithm, and contributed to algorithm sections of the report. Dr. Arnold J. Song advised methodology development and revised the final draft version of the report.

**Declaration of interest:** None.
