

## Accepted Manuscript

Choosing the best algorithm for event detection based on the intend application:  
a conceptual framework for syndromic surveillance

Céline Faverjon, John Berezowski

PII: S1532-0464(18)30156-4  
DOI: <https://doi.org/10.1016/j.jbi.2018.08.001>  
Reference: YJBIN 3031

To appear in: *Journal of Biomedical Informatics*

Received Date: 14 July 2017  
Revised Date: 28 June 2018  
Accepted Date: 4 August 2018

Please cite this article as: Faverjon, C., Berezowski, J., Choosing the best algorithm for event detection based on the intend application: a conceptual framework for syndromic surveillance, *Journal of Biomedical Informatics* (2018), doi: <https://doi.org/10.1016/j.jbi.2018.08.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title**

Choosing the best algorithm for event detection based on the intend application: a conceptual framework for syndromic surveillance.

**Authorship**

Céline Faverjon<sup>1</sup>, John Berezowski<sup>1</sup>
