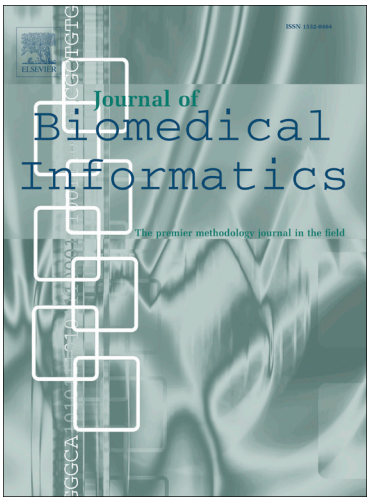
Accepted Manuscript



A study of Generalizability of Recurrent Neural Network-Based Predictive Models for Heart Failure Onset Risk using a Large and Heterogeneous EHR Data set

Laila R Bekhet, Yonghui Wu, Ningtao Wang, Xin Geng, Wenjin Jim Zheng, Fei Wang, Hulin Wu, Hua Xu, Degui Zhi

PII: S1532-0464(18)30117-5
DOI: https://doi.org/10.1016/j.jbi.2018.06.011
Reference: YJBIN 3000

To appear in: *Journal of Biomedical Informatics*

Received Date: 30 December 2017
Revised Date: 17 May 2018
Accepted Date: 14 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
