Heritable genotype contrast mining reveals novel gene associations specific to autism subgroups

Matt Spencer, Nicole Takahashi, Sounak Chakraborty, Judith Miles, Chi-Ren Shyu

PII: S1532-0464(17)30270-8
DOI: <https://doi.org/10.1016/j.jbi.2017.11.016>
Reference: YJBIN 2895

To appear in: *Journal of Biomedical Informatics*

Received Date: 1 September 2017
Revised Date: 15 November 2017
Accepted Date: 28 November 2017

Please cite this article as: Spencer, M., Takahashi, N., Chakraborty, S., Miles, J., Shyu, C-R., Heritable genotype contrast mining reveals novel gene associations specific to autism subgroups, *Journal of Biomedical Informatics* (2017), doi: <https://doi.org/10.1016/j.jbi.2017.11.016>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Heritable genotype contrast mining reveals novel gene associations specific to autism subgroups
