

Accepted Manuscript

A conservative and well-balanced surface tension model

Moataz O. Abu-Al-Saud, Stéphane Popinet, Hamdi A. Tchelepi

PII: S0021-9991(18)30104-9
DOI: <https://doi.org/10.1016/j.jcp.2018.02.022>
Reference: YJCPH 7860

To appear in: *Journal of Computational Physics*

Received date: 13 October 2017
Revised date: 23 January 2018
Accepted date: 10 February 2018

Please cite this article in press as: M.O. Abu-Al-Saud et al., A conservative and well-balanced surface tension model, *J. Comput. Phys.* (2018), <https://doi.org/10.1016/j.jcp.2018.02.022>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Demonstration of well-balancing irrespective of spatial resolution.
- Low spurious currents for the translating drop case.
- Very accurate results for thermo-capillary migration of a drop.
- Simple algorithms.
