

Accepted Manuscript

A Discontinuous Galerkin Material Point Method for the solution of impact problems in solid dynamics

Adrien Renaud, Thomas Heuzé, Laurent Stainier

PII: S0021-9991(18)30293-6
DOI: <https://doi.org/10.1016/j.jcp.2018.05.001>
Reference: YJCPH 8000

To appear in: *Journal of Computational Physics*

Received date: 13 December 2017
Revised date: 17 April 2018
Accepted date: 2 May 2018

Please cite this article in press as: A. Renaud et al., A Discontinuous Galerkin Material Point Method for the solution of impact problems in solid dynamics, *J. Comput. Phys.* (2018), <https://doi.org/10.1016/j.jcp.2018.05.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Development of the Discontinuous Galerkin Material Point method
- von Neumann stability analysis of the DGMPM
- Analytical solution of a one-dimensional hyperbolic problem for a hyperelastic Saint-Venant-Kirchhoff material.
