

Accepted Manuscript

A least-squares method for the inverse reflector problem in arbitrary orthogonal coordinates

René Beltman, Jan ten Thije Boonkamp, Wilbert IJzerman

PII: S0021-9991(18)30266-3
DOI: <https://doi.org/10.1016/j.jcp.2018.04.041>
Reference: YJCPH 7981

To appear in: *Journal of Computational Physics*

Received date: 21 February 2018
Revised date: 13 April 2018
Accepted date: 20 April 2018

Please cite this article in press as: R. Beltman et al., A least-squares method for the inverse reflector problem in arbitrary orthogonal coordinates, *J. Comput. Phys.* (2018), <https://doi.org/10.1016/j.jcp.2018.04.041>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Novel least-squares algorithm.
- Significant improvement of accuracy.
- Speed-up of convergence.
