This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Retrospective cost adaptation is applied to adjust the coefficients of a RANS model.
- The model is verified by used on two unsteady test cases.
- Results demonstrate that the coefficients can be updated to match experimental data.
- The model improves results when compared to the original RANS model.
