Computing singularly perturbed differential equations

Sabyasachi Chatterjee, Amit Acharya, Zvi Artstein

PII: S0021-9991(17)30778-7
DOI: <https://doi.org/10.1016/j.jcp.2017.10.025>
Reference: YJCPH 7663

To appear in: *Journal of Computational Physics*

Received date: 21 February 2017
Revised date: 13 October 2017
Accepted date: 18 October 2017

Please cite this article in press as: S. Chatterjee et al., Computing singularly perturbed differential equations, *J. Comput. Phys.* (2017), <https://doi.org/10.1016/j.jcp.2017.10.025>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A computational tool for coarse-graining nonlinear ODE systems in time is presented.
- Conservative, dissipative, and forced systems are all dealt with in a unified manner.
- No assumptions of ergodicity are required.
