Hybrid approaches for multiple-species stochastic reaction-diffusion models

Fabian Spill, Pilar Guerrero, Tomas Alarcon, Philip K. Maini, Helen Byrne

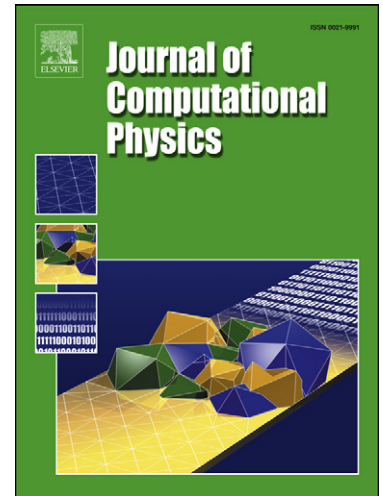

PII: S0021-9991(15)00447-7
DOI: <http://dx.doi.org/10.1016/j.jcp.2015.07.002>
Reference: YJCPH 5985

To appear in: *Journal of Computational Physics*

Received date: 12 November 2014
Revised date: 30 June 2015
Accepted date: 1 July 2015

Please cite this article in press as: F. Spill et al., Hybrid approaches for multiple-species stochastic reaction-diffusion models, *J. Comput. Phys.* (2015), <http://dx.doi.org/10.1016/j.jcp.2015.07.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A novel hybrid stochastic/deterministic reaction-diffusion simulation method is given.
- Can massively speed up stochastic simulations while preserving stochastic effects.
- Can handle multiple reacting species.
- Can handle moving boundaries.
