

Accepted Manuscript

A Methodological Evaluation of Natural User Interfaces for Immersive 3D Graph Explorations

Ugo Erra, Delfina Malandrino, Luca Pepe, Vittorio Scarano

PII: S1045-926X(17)30260-4
DOI: [10.1016/j.jvlc.2017.11.002](https://doi.org/10.1016/j.jvlc.2017.11.002)
Reference: YJVL 817

To appear in: *Journal of Visual Languages and Computing*

Received date: 27 March 2015
Revised date: 2 September 2016
Accepted date: 13 November 2017

Please cite this article as: Ugo Erra, Delfina Malandrino, Luca Pepe, Vittorio Scarano, A Methodological Evaluation of Natural User Interfaces for Immersive 3D Graph Explorations, *Journal of Visual Languages and Computing* (2017), doi: [10.1016/j.jvlc.2017.11.002](https://doi.org/10.1016/j.jvlc.2017.11.002)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A real-time 3D exploration and interaction system for graph visualization.
- A natural user interface for 3D interaction in a virtual reality environment.
- A description the 3D Graph Explorer plug-in and a presentation of the interaction design.
- An empirical comparison of the proposed system with the traditional mouse-keyboard combination.
