Machine learning in multi-agent systems using associative arrays

Przemysław Spychalski , Ryszard Arendt

PII: S0167-8191(18)30081-4
DOI: [10.1016/j.parco.2018.03.006](https://doi.org/10.1016/j.parco.2018.03.006)
Reference: PARCO 2441

To appear in: *Parallel Computing*

Received date: 1 January 2017
Revised date: 1 January 2018
Accepted date: 25 March 2018

Please cite this article as: Przemysław Spychalski , Ryszard Arendt , Machine learning in multi-agent systems using associative arrays, *Parallel Computing* (2018), doi: [10.1016/j.parco.2018.03.006](https://doi.org/10.1016/j.parco.2018.03.006)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Machine learning algorithm based on associative arrays is introduced.
- Improvement of request processing efficiency after algorithm implementation is evaluated.
- Performance comparison of associative learning algorithm with artificial neural network and Bayesian network is conducted.
