This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A multi-sensor data fusion approach based on FIS and EWS is proposed.
- A Health Risk Assessment and Decision-Making algorithm is proposed.
- The proposed approach is compared to an existing one from the literature.
