This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

1. A systematic review of HFLTSS is presented.
2. The current developments are classified by inherent computational strategies.
3. A comparative analysis is proposed to highlight the role of HFLTSS in QDM.
4. Some existing issues of handling HFLTSS are addressed.
5. Current challenges are pointed out towards high quality progress.
