Image Stitching by Line-guided Local Warping with Global Similarity Constraint

Tian-Zhu Xiang, Gui-Song Xia, Xiang Bai, Liangpei Zhang

PII: S0031-3203(18)30223-1
DOI: [10.1016/j.patcog.2018.06.013](https://doi.org/10.1016/j.patcog.2018.06.013)
Reference: PR 6587

To appear in: *Pattern Recognition*

Received date: 24 February 2017
Revised date: 12 March 2018
Accepted date: 15 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Line features are adopted to impose strong geometric constraints for image stitching.
- A new weight integration strategy to combine global similarity constraint with projective warping is proposed.
- A robust and effective two-stage stitching framework is proposed to provide good alignment and reduced distortions.
