Fast and accurate computation of orthogonal moments for texture analysis

Cecilia Di Ruberto, Lorenzo Putzu, Giuseppe Rodriguez

PII: S0031-3203(18)30222-X  
DOI: [10.1016/j.patcog.2018.06.012](https://doi.org/10.1016/j.patcog.2018.06.012)  
Reference: PR 6586

To appear in: *Pattern Recognition*

Received date: 27 February 2018  
Revised date: 4 June 2018  
Accepted date: 15 June 2018

Please cite this article as: Cecilia Di Ruberto, Lorenzo Putzu, Giuseppe Rodriguez, Fast and accurate computation of orthogonal moments for texture analysis, *Pattern Recognition* (2018), doi: [10.1016/j.patcog.2018.06.012](https://doi.org/10.1016/j.patcog.2018.06.012)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Orthogonal moments are powerful descriptors for image classification.
- A fast and accurate computation is essential to guarantee their effectiveness.
- Computing moments from GLCMs enhance classification performance.
- The use of weighted moments results in better accuracy in some situations.
