This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A novel clustering approach is proposed
- The approach encodes the objects to be clustered with binary signatures
- The binary signatures are extracted through a set of one-class models
- The approach is agnostic to the shape of clustering
- The proposed method favourably compares with state of the art
