## **Accepted Manuscript**

Clustering in large data sets with the limited memory bundle method

Napsu Karmitsa, Adil M. Bagirov, Sona Taheri

PII: S0031-3203(18)30208-5 DOI: 10.1016/j.patcog.2018.05.028

Reference: PR 6572

To appear in: Pattern Recognition

Received date: 15 December 2017

Revised date: 7 May 2018 Accepted date: 30 May 2018

Please cite this article as: Napsu Karmitsa, Adil M. Bagirov, Sona Taheri, Clustering in large data sets with the limited memory bundle method, *Pattern Recognition* (2018), doi: 10.1016/j.patcog.2018.05.028

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

#### ACCEPTED MANUSCRIPT

### Highlights

- A nonsmooth optimization based algorithm for solving the minimum sum- of-squares clustering problems is developed.
- The proposed algorithm is tested and compared to other algorithms using large real world data sets.
- The proposed algorithm is shown to be accurate and efficient for solving clustering problems in data set containing hundreds of thousands of points and/or hundreds of attributes.
