This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A prospective survey that merges the e-security, e-health and e-learning on mobile devices.
- A vision of the future developments in on-line processing of handwriting.
- A new mobile device application, the Personal Digital Bodyguard.
- An integrated view of one possible outcome of research in human motor control.
- A common goal for computer scientists, hardware engineers, neuroscientists, education experts.
