

## Accepted Manuscript

Self-Learning for Face Clustering

Xiaoshuang Shi, Zhenhua Guo, Fuyong Xing, Jinzheng Cai, Lin Yang

PII: S0031-3203(18)30063-3  
DOI: [10.1016/j.patcog.2018.02.008](https://doi.org/10.1016/j.patcog.2018.02.008)  
Reference: PR 6455

To appear in: *Pattern Recognition*

Received date: 23 October 2017  
Revised date: 27 January 2018  
Accepted date: 10 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A self-learning framework including image decorrelation and a self-paced learning process, for face clustering.
- Providing quantitative analysis on the Gaussian distribution of global and local whitening faces.
- A novel self-paced learning model for face clustering, inspired by the learning process of human.
