Mixture Correntropy for Robust Learning

Badong Chen, Xin Wang, Na Lu, Shiyuan Wang, Jiuwen Cao,
Jing Qin

PII: S0031-3203(18)30059-1
DOI: [10.1016/j.patcog.2018.02.010](https://doi.org/10.1016/j.patcog.2018.02.010)
Reference: PR 6457

To appear in: *Pattern Recognition*

Received date: 12 October 2017
Revised date: 2 February 2018
Accepted date: 10 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The novel concept of mixture correntropy is proposed.
- Some important properties of the mixture correntropy are presented.
- Applications of the mixture correntropy to extreme learning machine (ELM) and kernel adaptive filtering (KAF) are studied.
- Experimental results are provided to show the excellent performance of the developed new algorithms.
