Deep Fisher Discriminant Learning for Mobile Hand Gesture Recognition

Ce Li, Chunyu Xie, Baochang Zhang, Chen Chen, Jungong Han

PII: S0031-3203(17)30519-8
DOI: [10.1016/j.patcog.2017.12.023](https://doi.org/10.1016/j.patcog.2017.12.023)
Reference: PR 6408

To appear in: *Pattern Recognition*

Received date: 4 July 2017
Revised date: 9 December 2017
Accepted date: 30 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- we collect a large mobile gesture database using an Android Huawei device, which is the largest database in published studies for mobile gesture recognition systems.
- we incorporate Fisher criterion into BiLSTM network and propose F-BiLSTM and F-BiGRU to improve the traditional softmax loss training function.
- Extensive experiments on our MGD, BUAA Mobile Gesture database, and a public database are conducted to verify the superior performance of the proposed networks.
