Distance Metric Optimization Driven Convolutional Neural Network
for Age Invariant Face Recognition

Ya Li, Guangrun Wang, Lin Nie, Qing Wang, Wenwei Tan

PII: S0031-3203(17)30404-1
DOI: [10.1016/j.patcog.2017.10.015](https://doi.org/10.1016/j.patcog.2017.10.015)
Reference: PR 6327

To appear in: *Pattern Recognition*

Received date: 14 November 2016
Revised date: 30 September 2017
Accepted date: 7 October 2017

Please cite this article as: Ya Li, Guangrun Wang, Lin Nie, Qing Wang, Wenwei Tan, Distance Metric Optimization Driven Convolutional Neural Network for Age Invariant Face Recognition, *Pattern Recognition* (2017), doi: [10.1016/j.patcog.2017.10.015](https://doi.org/10.1016/j.patcog.2017.10.015)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Propose a new distance metric optimization driven deep-learning framework for age-invariant face recognition.
- Learn feature representations and the similarity measure simultaneously in an end-to-end way.
- Train the joint network using a novel optimization method and carefully designed training strategies.
- The experimental results demonstrate the effectiveness of our approach.
