Cross Modal Similarity Learning with Active Queries

Nengneng Gao, Sheng-Jun Huang, Yifan Yan, Songcan Chen

PII: S0031-3203(17)30199-1
DOI: 10.1016/j.patcog.2017.05.011
Reference: PR 6150

To appear in: *Pattern Recognition*

Received date: 14 November 2016
Revised date: 24 March 2017
Accepted date: 13 May 2017

Please cite this article as: Nengneng Gao, Sheng-Jun Huang, Yifan Yan, Songcan Chen, Cross Modal Similarity Learning with Active Queries, *Pattern Recognition* (2017), doi: 10.1016/j.patcog.2017.05.011

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A novel approach COSLAQ for cross modal similarity learning with active queries is proposed.
- Disagreement-based active query strategy explores the most valuable supervised information.
- Uncertainty of similarity learning model is utilized to avoid querying outliers and noises.
