This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A four-layer indicator system for the evaluation of Agricultural engineering technology application level is proposed.
- A method were put forward to optimize the indicator system.
- The method relies on the combination of the relation matrix and the criteria matrix.
