Face Sketch Aging via Aging Oriented Principal Component Analysis

Shengchuan Zhang, Rongrong Ji, Ling Cai, Xinbo Gao

PII: S0167-8655(17)30296-9
DOI: [10.1016/j.patrec.2017.08.029](https://doi.org/10.1016/j.patrec.2017.08.029)
Reference: PATREC 6910

To appear in: *Pattern Recognition Letters*

Received date: 1 June 2017
Revised date: 8 August 2017
Accepted date: 29 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A simple but effective method for face sketch aging via PCA is proposed.
- The method skips the time consuming process of collecting sketch aging sequences.
- The method utilizes the photo aging sequences to conduct face sketch aging problem.
- Performance of the proposed method is promising.
