Extreme-constrained spatial-spectral corner detector for image-level hyperspectral image classification

Yanshan Li , Jianjie Xu , Rongjie Xia , Qinghua Huang ,
Weixin Xie , Xuelong Li

PII: S0167-8655(18)30101-6
DOI: [10.1016/j.patrec.2018.03.022](https://doi.org/10.1016/j.patrec.2018.03.022)
Reference: PATREC 7117

To appear in: *Pattern Recognition Letters*

Received date: 8 May 2017
Revised date: 17 March 2018
Accepted date: 22 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose a new feature named extreme-constrained spatial-spectral corner for HSI.
- We put forward a new Harris corner detector for HSI.
- We design a new framework of HSI image-level classification.
