Research Highlights (Required)

To create your highlights, please type the highlights against each `\item` command.

It should be short collection of bullet points that convey the core findings of the article. It should include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point.)

- New multi-view semi-supervised learning strategies for automatic sentence segmentation are proposed.
- Effective learning even if small sets of sentence boundary labeled data is available.
- 3-view and committee-based strategies using prosodic, lexical and morphological information.
- Improved strategies based on co-training incorporating with agreement, disagreement and self-combined.
- Better automatic sentence segmentation results based on 3-view and committee-based strategies.
