This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A semi-parametric cascaded regression framework for face alignment
- Hybrid model between Neural networks and Random Forests
- New training procedure for regression and evaluation
- Greedy neural forests combines high model expressivity and very fast evaluation
- Application to Small, medium and large head poses alignment
