Unsupervised Feature Analysis with Sparse Adaptive Learning

Xiao-dong WANG, Rung-Ching CHEN, Chao-qun HONG,
Zhi-qiang ZENG

PII: S0167-8655(17)30468-3
DOI: 10.1016/j.patrec.2017.12.022
Reference: PATREC 7038

To appear in: *Pattern Recognition Letters*

Received date: 31 December 2016
Revised date: 15 August 2017
Accepted date: 18 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Perform adaptive manifold learning and feature selection jointly.
- Impose the non-squared l2-norm to guarantee the clarity of the manifold structure.
- Propose an efficient algorithm to solve the non-smooth objective function.
- Verify the effectiveness of our method on several publicly available datasets.
