This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Research Highlights (Required)

- Critical survey including current challenges and future directions for using gaze analysis on biometric human authentication.
- Extensive evaluation of existing gaze analysis methods using quantitative and qualitative criteria.
- Experimental evaluation of three existing state-of-the art gaze analysis methods using the same database.
