Pattern classification to optimize the performance of Transcranial Doppler Ultrasonography-based brain machine interface

Jie Lu , Khondaker A. Mamun , Tom Chau

PII: S0167-8655(15)00229-9
DOI: [10.1016/j.patrec.2015.07.020](https://doi.org/10.1016/j.patrec.2015.07.020)
Reference: PATREC 6289

To appear in: *Pattern Recognition Letters*

Received date: 24 February 2014
Accepted date: 17 July 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Determined features and classifiers that enhance TCD-BCI performance beyond that previously reported in the literature.
- Identified algorithms conducive to online TCD-BCI implementation.
- Achieved competitive classification accuracies using a shorter mental task duration than previous TCD-BCI studies.
