Graph edit distance: moving from global to local structure to solve the graph-matching problem

Francesc Serratosa , Xavier Cortés

PII: S0167-8655(15)00258-5
DOI: [10.1016/j.patrec.2015.08.003](https://doi.org/10.1016/j.patrec.2015.08.003)
Reference: PATREC 6311

To appear in: *Pattern Recognition Letters*

Received date: 30 January 2015
Accepted date: 5 August 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Sub-optimal computation of Graph Edit Distance.
- Error-tolerant algorithms: Fast Bipartite and Hausdorff Edit Distance.
- Analysis of 8 different local sub-structures.
- Recognition ratio and runtime comparison.
