**Abstract:** Entrepreneurship has become increasingly important for innovations and economic development. However, there is limited information systems research examining the role of regional ICT for entrepreneurs. This study investigates the direct effect of regional ICT access on individuals' entrepreneurial performance and the interaction effect between regional ICT access and *guanxi* in the context of Chinese business and economy. Drawing upon a matched large-scale dataset, we found that regional ICT access in terms of access to the Internet, fixed phone, and mobile phone had a significant impact on performance. Furthermore, regional ICT access had a positive interaction effect with *guanxi*.

**KeyWords:** Regional ICT access; *Guanxi*; Entrepreneurship; China
