This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

**Highlights**

- Adaptive tracking control for switched strict-feedback nonlinear systems is proposed.
- The generalized fuzzy hyperbolic model is used to approximate nonlinear functions.
- The designed controller has fewer design parameters comparing with existing methods.
