This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- 1 Address the label insufficiency issue in classifying vehicle type by using GSSL.
- 2 Make the affinity more reliable by using graph fusion.
- 3 Achieve over 70% accuracy by only using 5% labeled instances.
