

## Accepted Manuscript

Multilevel thresholding selection based on variational mode decomposition for image segmentation

Jiafu Li , Wenyan Tang , Jun Wang , Xiaolin Zhang

PII: S0165-1684(18)30030-6  
DOI: [10.1016/j.sigpro.2018.01.022](https://doi.org/10.1016/j.sigpro.2018.01.022)  
Reference: SIGPRO 6715

To appear in: *Signal Processing*

Received date: 6 September 2017  
Revised date: 15 January 2018  
Accepted date: 16 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- An equivalent objective function of VMD is proved.
- The histogram is decomposed into several sub modes based on between-class variance function.
- Two principles of threshold selection are proposed based on histogram decomposition.
- The proposed method exhibits higher efficiency than others.
