This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Overview of the recent advances of 360 video coding, especially in projection and evaluation methods
- Projections benefiting for 360 video coding are classified and compared
- The current problems and future trends of omnidirectional video processing are discussed
