Multi-Source Phase Retrieval from Multi-Channel Phaseless STFT Measurements

Yina Guo, Anhong Wang, Wenwu Wang

PII: S0165-1684(17)30348-1
DOI: [10.1016/j.sigpro.2017.09.026](https://doi.org/10.1016/j.sigpro.2017.09.026)
Reference: SIGPRO 6618

To appear in: *Signal Processing*

Received date: 9 May 2017
Revised date: 20 August 2017
Accepted date: 26 September 2017

Please cite this article as: Yina Guo, Anhong Wang, Wenwu Wang, Multi-Source Phase Retrieval from Multi-Channel Phaseless STFT Measurements, *Signal Processing* (2017), doi: [10.1016/j.sigpro.2017.09.026](https://doi.org/10.1016/j.sigpro.2017.09.026)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A new model is formed for multi-source phase retrieval problem.
- An RMSPR algorithm is proposed which couples the ICA method with a GD algorithm.
- Developed a modified LS loss function to improve the RMSPR algorithm.
