Where has all the Power Gone? Energy Production and Loss in Vocalization

Ingo R. Titze

PII: S0167-6393(17)30429-6
DOI: [10.1016/j.specom.2018.05.003](https://doi.org/10.1016/j.specom.2018.05.003)
Reference: SPECOM 2565

To appear in: *Speech Communication*

Received date: 4 December 2017
Revised date: 3 April 2018
Accepted date: 15 May 2018

Please cite this article as: Ingo R. Titze , Where has all the Power Gone? Energy Production and Loss in Vocalization, *Speech Communication* (2018), doi: [10.1016/j.specom.2018.05.003](https://doi.org/10.1016/j.specom.2018.05.003)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Vocal Efficiency is divided into conversion efficiency, transmission efficiency, and radiation efficiency
- Conversion efficiency is on the order of 10 %
- Efficiency control is by lung pressure and adduction
