

Accepted Manuscript

Empirically derived method and software for semi-automatic calibration of Cellular Automata land-use models

Charles P. Newland, Aaron C. Zecchin, Holger R. Maier, Jeffrey P. Newman, Hedwig van Delden

PII: S1364-8152(17)31310-5

DOI: 10.1016/j.envsoft.2018.07.013

Reference: ENSO 4256

To appear in: *Environmental Modelling and Software*

Received Date: 15 December 2017

Accepted Date: 24 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Empirically derived method and software for semi-automatic**
2 **calibration of Cellular Automata land-use models**
