Title: Simulation and experimental study on the mechanism of the chlorination of azithromycin

Authors: Qiaozhen Guo, Zhenxia Du, Bing Shao

PII: S0304-3894(18)30541-7
DOI: <https://doi.org/10.1016/j.jhazmat.2018.07.024>
Reference: HAZMAT 19532

To appear in: *Journal of Hazardous Materials*

Received date: 7-2-2018
Revised date: 11-6-2018
Accepted date: 5-7-2018

Please cite this article as: Guo Q, Du Z, Shao B, Simulation and experimental study on the mechanism of the chlorination of azithromycin, *Journal of Hazardous Materials* (2018), <https://doi.org/10.1016/j.jhazmat.2018.07.024>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Simulation and experimental study on the mechanism of the chlorination of azithromycin
