

## Accepted Manuscript

Title: Fe(III)-oxalate complex mediated phosphate released from diazinon photodegradation: Pathway signatures based on oxygen isotopes<!--<query id="Q2">Your article is registered as belonging to the Special Issue/Collection entitled Emerging Contaminants. If this is NOT correct and your article is a regular item or belongs to a different Special Issue please contact I.Samikannu@elsevier.com immediately prior to returning your corrections.</query>-->

Authors: Jianwei Zhao, Yongcan Jiang, Minghao Kong, Guanglong Liu, Dionysios D. Dionysiou

PII: S0304-3894(18)30512-0  
DOI: <https://doi.org/10.1016/j.jhazmat.2018.07.001>  
Reference: HAZMAT 19509

To appear in: *Journal of Hazardous Materials*

Received date: 24-4-2018  
Revised date: 28-6-2018  
Accepted date: 1-7-2018

Please cite this article as: Zhao J, Jiang Y, Kong M, Liu G, Dionysiou DD, Fe(III)-oxalate complex mediated phosphate released from diazinon photodegradation: Pathway signatures based on oxygen isotopes, *Journal of Hazardous Materials* (2018), <https://doi.org/10.1016/j.jhazmat.2018.07.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
