Title: Comparison of constant, pulsed, incremental and decremental direct current applications on solid-liquid phase separation in oil sediments

Authors: Esmaeel Kariminezhad, Maria Elektorowicz

PII: S0304-3894(18)30226-7
DOI: <https://doi.org/10.1016/j.jhazmat.2018.04.002>
Reference: HAZMAT 19285

To appear in: *Journal of Hazardous Materials*

Received date: 1-11-2017
Revised date: 7-3-2018
Accepted date: 2-4-2018

Please cite this article as: Kariminezhad E, Elektorowicz M, Comparison of constant, pulsed, incremental and decremental direct current applications on solid-liquid phase separation in oil sediments, *Journal of Hazardous Materials* (2018), <https://doi.org/10.1016/j.jhazmat.2018.04.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Comparison of constant, pulsed, incremental and decremental direct current applications on solid-liquid phase separation in oil sediments
