Title: Mussel-inspired functionalization of electrochemically exfoliated graphene: based on self-polymerization of dopamine and its suppression effect on the fire hazards and smoke toxicity of thermoplastic polyurethane

Authors: Wei Cai, Junling Wang, Ying Pan, Wenwen Guo, Xiaowei Mu, Xiaming Feng, Bihe Yuan, Xin Wang, Yuan Hu

PII: S0304-3894(18)30173-0
DOI: <https://doi.org/10.1016/j.jhazmat.2018.03.021>
Reference: HAZMAT 19241

To appear in: *Journal of Hazardous Materials*

Received date: 1-11-2017
Revised date: 26-2-2018
Accepted date: 13-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mussel-inspired functionalization of electrochemically exfoliated graphene: based on self-polymerization of dopamine and its suppression effect on the fire hazards and smoke toxicity of thermoplastic polyurethane
